STANDARD FELINE NEUTER FEES

Pre-anesthetic Bloodwork (under 6 years) $74.95
(6 years and older) $125.00
Pre-anesthetic bloodwork allows our doctors to “take a look” inside your pet before surgery is begun. Depending on the age of your pet, different protocols are followed. Pre-anesthetic bloodwork checks liver and kidney enzymes, glucose and protein levels, complete blood count, and platelet count. Patients over 6 years old will receive more comprehensive bloodwork.

Pain Injection $25.00
A pain injection will help ease pain after surgery. Our pain injections are classified as NSAIDs (non-steroidal anti-inflammatory drug). These drugs are safe for surgical patients.

Standard Neuter Total $209.95 - 280.00

OPTIONAL SERVICES (check if yes)

Lidocaine Block $35.00
Declaw with Laser $157.00

Yesterday’s News (for declaws) $11.18
Yesterday’s News is a cat litter that is safe for use after surgery, and is made from recycled newspaper. (5 lbs)

1 Night Boarding Pre- OR Post-Surgery Free
Let us pamper your pet and provide a calm, quiet, and comfortable environment either the night before surgery or the night following surgery. *Required for declaws.

E-Collar $10-20.00
An e-collar will prevent your cat from chewing at sutures and/or licking the incision site. If you believe your cat is likely to exhibit these behaviors, you may want us to send an e-collar home with you. We will be more than happy to fit your pet with the appropriate size e-collar, and show you how to put it on your cat if needed.

Home Again Microchip $50.00
A Home Again Microchip is the best way to provide permanent identification for your pet. The chip is inserted via syringe, and each chip has its own unique number to identify your pet. If your pet ever wonders off and is taken to either a shelter or veterinary clinic, your pet’s number will show up on the microchip scanner and we can much more easily get your pet back home again.

I have read and understand that I am responsible for the price quoted.
